## THAT MAN CHRISTENSEN

whose first name is Adolph, and whose office is located at 1433 Brown street, is very busy just now with his many men renovating the fronts of brick houses.

CHRISTENSEN does this work by his process of cleaning and repointing the brick that the whole front looks even better than it did when first erected. The work does not cost as much as repainting, while it looks very much better, for it brings out the world renowned beauty of the old time Philadelphia brickwork.

CHRISTENSEN'S process is a sure cure for the unrentable dwellings. Owners as well as Real Estate agents should make a note of this fact.

## ARCHITECTS' NOTES

Zantinger & Borie, architects, 251 South Fourth street, have plans on boards for a three-story residence, to be built in Chestnut Hill, for John S. Jenks.

Charles L. Lockwood, 7811 St. Martin's lane, has sold a lot measuring 171 x 152 feet, at the corner of Allen's lane and Bryan street, to Frank Roma, for \$14,500.

Seymour Davis & Paul A. Davis, 3d, architects, 1600 Chestnut street, have invited revised bids on the proposed Y. M. C. A. building, to be built in Richmond, Va., to cost about \$150,000.

It is stated that Wesley Leshner Blithe, architect, 608 Chestnut street, is preparing plans for a stone and frame Dutch Colonial residence, to be built in Narberth, Pa., for Ansel D. Jones.

## ARCHITECTS' NOTES

Walter F. Price, architect, 714 Walnut street, is completing plans for a new stone hall building, measuring 32 x 85 feet, to be built in Haverford for the Haverford College, to cost about \$30,000.

Thomas, Churchman & Molitor, architects, North American Building, will prepare revised plans for the Morton Boys Club Industrial School, to be built at Haines' and Ely streets, Germantown.

John T. Windrim, architect, 1201 Chestnut street, has invited estimates for a stone tower and belfry on the Protestant Episcopal Church of St. James the Less, at Nicetown lane and Clearfield street. W. T. Miller, builder, is bidding.

Harbert, Claghorn & Hood, real estate brokers, Bailey Building, have sold a large tract of land at the corner of Roberts road and Wyndon avenue, Bryn Mawr, Pa., to Charles E. Loxley, who, it is stated, proposes to build a handsome residence on the site.

Stearns & Castor, architects, Stephen Girard Building, are engaged on plans for a handsome three-story residence in the Elizabethan style of architecture, to be built on Leiper street, Frankford; for Arthur R. Singer. It will contain twelve rooms and two baths.

whose first name is Adolph, and whose office is located at 1433 Brown street, is very busy just now with his many men renovating the fronts of brick houses.

CHRISTENSEN does this work by his process of cleaning and repointing the brick that the whole front looks even better than it did when first erected. The work does not cost as much as repainting, while it looks very much better, for it brings out the world renowned beauty of the old time Philadelphia pressed brick front.

CHRISTENSEN'S process is a sure cure for the untrenable dwellings. Owners as well as Real Estate agents should make note of this fact.

# WHEN YOU PAINT YOUR HOUSE

You should insist that the first coat should be put on before a particle of putty is used.

Unless this is done a reputation for bad work naturally follows both the Architect and Builder and this holds good in both new and old work.

Dry wood as well as dry brick will not hold putty no matter what other effort is made in that direction.

I will cheerfully give you an estimate for painting new or old work on the "BEST WAY" basis and guarantee results.

At a meeting held last Friday by the members of the Springhaven Country Club, of Delaware county, Pa., it was decided to enlarge the present club house. While the plans for just what would definitely be done were not decided upon, it was proposed to build an addition to the present building, to cost about \$7,000, on the east and south, 22 feet wide by 70 feet long. In this will be placed the locker room and wash room. The present locker room will be turned into a kitchen. This will allow a porch to be constructed along the entire length of the building 72 feet long and 22 feet wide for a part of the distance and 16 feet the remainder of the distance. The porches will be turned into the main rooms of the present buildings. The subject has been under consideration for some time, but did not assume definite shape until the meeting on Friday last.

Horace Trumbauer, architect, Land Title Building, will shortly invite estimates on the seven-story brick and stone addition to the Union League, to face on Fifteenth, below Sansom street. The plans call for the following: In the sub-basement a steam, electric light and refrigerating plant, with kitchen, laundry, storeroom, etc., in the main basement. On the first floor will be a billiard room, ac-

commodating twenty-four tables. This will permit of the present billiard room being converted into a much-needed extension of the present cafe. On the second floor will be the League banquet hall. On the third floor there will be card, chess and several private dining rooms. On the fourth, fifth and sixth floors will be sleeping rooms, single and en suite, with the upper floor probably to be used as servants' quarters. ## THAT MAN CHRISTENSEN

whose first name is Adolph, and whose office is located at 1433 Brown street, is very busy just now with his many men renovating the fronts of brick houses.

CHRISTENSEN does this work by his process of cleaning and repointing the brick that the whole front looks even better than it did when first erected. The work does not cost as much as repainting, while it looks very much better, for it brings out the long renowned beauty of the old time Philadelphia dressed brick front.

CHRISTENSEN'S process is a sure cure for the unrentable dwellings. Owners as well as Real Estate agents should make a note of this fact.

# WHEN YOU PAINT YOUR HOUSE

You should insist that the first coat should be put on before a particle of putty is used.

Unless this is done a reputation for bad work naturally follows both the Architect and Builder and this holds good in both new and old work.

Dry wood as well as dry brick will not hold putty no matter what other effort is made in that direction

I will cheerfully give you an estimate for painting new or old work on the "BEST WAY" basis and guarantee results.

whose first name is Adolph, and whose office is located at 1433 Brown street, is very busy just now with his many men renovating the fronts of brick houses.

CHRISTENSEN does this work by his process of cleaning and repointing the brick that the whole front looks even better than it did when first erected. The work does not cost as much as repointing, while it looks very much better, for it brings out the world renowned beauty of the old time Philadelphia pressed brick front.

CHRISTENSEN'S process is a sure cure for the unrentable dwellings. Owners as well as Real Estate agents should make a note of this fact.

# WHEN YOU PAINT YOUR HOUSE

You should insist that the first coat should be put on before a particle of putty is used.

Unless this is done a reputation for bad work naturally follows both the Architect and Builder and this holds good in both new and old work.

Dry wood as well as dry brick will not hold putty no matter what other effort is made in that direction.

I will cheerfully give you an estimate for painting new or old work on the "BEST WAY" basis and guarantee results.

whose first name is Adolph, and whose office is located at 1433 Brown street, is very busy just now with his many men renovating the fronts of brick houses.

CHRISTENSEN does this work by his process of cleaning and repointing the brick that the whole front looks even better than it did when first erected. The work does not cost as much as repainting, while it looks very much better, for it brings out the world renowned beauty of the old time Philadelphia pressed brick front.

CHRISTENSEN'S process is a sure cure for the unrentable dwellings. Owners as well as Real Estate agents should make a note of this fact.

# WHEN YOU PAINT YOUR HOUSE

You should insist that the first coat should be put on before a particle of putty is used.

Unless this is done a reputation for bad work naturally follows both the Architect and Builder and this holds good in both new and old work.

Dry wood as well as dry brick will not hold putty no matter what other effort is made in that direction

I will cheerfully give you an estimate for painting new or old work on the "BEST WAY" basis and guarantee results.

## THAT MAN CHRISTENSEN

whose first name is Adolph, and whose office is located at 1433 Brown street, is very busy just now with his many men renovating the fronts of brick houses.

CHRISTENSEN does this work by his process of cleaning and repointing the brick that the whole front looks even better than it did when first erected. The work does not cost as much as repainting, while it looks very much better, for it brings out the world renowned beauty of the old time Philadelphia pressed brick front.

CHRISTENSEN'S process is a sure cure for the unrenowned dwellings. Owners as well as Res' Estate agents should make a note of this fact.

# WHEN YOU PAINT YOUR HOUSE

You should insist that the first coat should be put on before a particle of putty is used.

Unless this is done a reputation for bad work naturally follows both the Architect and Builder and this holds good in both new and old work.

Dry wood as well as dry brick will not hold putty no matter what other effort is made in that direction

I will cheerfully give you an estimate for painting new or old work on the "BEST WAY" basis and guarantee results.

### F. WEBER & CO'S. NEW CATALOGUE.

If the average reader fully comprehended the perplexing difficulties associated with the production of a catalogue sufficiently large to meet the requirements of an extensive business, together with the great cost of printing, he would be sure to give it the proper care in order that it might be within easy reach when needed. The new catalogue of the above firm is now ready for delivery to architects, engineers and builders. It contains 280 pages and embraces many new things properly prepared to expedite the work of the office as well as that in the field in all directions. The present volume is number 300, which, by the way, does not mean that three hundred such catalogues have been issued by F. Weber & Co., but it does mean that it numbers 300 in the great variety of price lists, catalogues, etc., which this firm has issued since it first began business. F. Weber & Co. have branch houses in Baltimore and St. Louis, where the concern is as popular as it is in Philadelphia. The Philadelphia address is 1125 Chestnut street.

# WHEN YOU PAINT YOUR HOUSE

You should insist that the first coat should be put on before a particle of putty is used.

Unless this is done a reputation for bad work natural'y follows both the Architect and Builder and this holds good in both new and old work.

Dry wood as well as dry brick will not hold putty no matter what other effort is made in that direction

I will cheerfully give you an estimate for painting new or old work on the "BEST WAY" basis and guarantee results.

Walter Smedley, architect, Stephen Girard Building, is engaged on plans for a three-story addition to the Friends' Asylum, in Frankford.

Bailey & Bassett, architects, 421 Chestnut street, are engaged on plans for three fine dwellings, to be built in Villanova, Pa., for the Villanova Land Company.

Seward L. Bowser, builder, 3527 North Nineteenth street, has purchased the property at the southwest corner of Washington Lane and Chew street, Germantown, from Peter and Catharine Deacon. It is the purchaser's intention to begin an operation of dwellings on the site.

Charles L. Hofmann, architect, 911 Walnut street, has completed revised plans for a five-story frame and cement block hotel, 36 x 98 feet, to be built in Ocean City, N. J., for J. Bounds. It will contain sixty-four rooms and fourteen baths, with all modern appointments.

Watson & Huckel, architects, 1211 Walnut street, will invite estimates in a few weeks on the proposed new three-story county court house building to be built in Bridgeton, N. J. The plans will call for a brick structure, with Indiana limestone trimmings, 110 x 130 feet, with two wings.

Charles F. Kindred, the former political leader of the Twenty-ninth ward, has sold to Helen Guest two tracts of land consisting of 72½ acres, one on Castor road east of Dark Run lane, 64 acres, and the other at the northeast corner of Castor road and Cottman streets, for \$25,000.

Mellvain & Roberts, architects, Land Title Building, are engaged on plans for a two and a half-story stone residence to be built in Ardmore, Pa., to cost about \$15,000. They are also completing plans for four fine residences to be built in Villanova, to cost about \$100,000, for H. S. Kerbaugh.

George T. Pearson, architect, 427 Walnut street, is engaged on plans and specifications for a three-story stone club house for the Philadelphia Cricket Club, in Chestnut Hill, to replace the building recently destroyed by fire. The plans of the new building will call for a structure to cost about \$40,000.

Schwartz & Gross, architects, 347 Fifth avenue, New York, are engaged on plans and specifications for a twelve-story brick and stone apartment house to be built on the north side of One Hundred and Tenth street, east of Broadway, that city, for the Carlyle Realty Company, 198 Broadway, to cost about \$800,000.

Charles E. Oelschlaeger, architect, Harrison Building, has distributed plans among builders for estimates on alterations and a one-story brick addition, 18 x 30 feet, to the store

and dwelling at 250 North Tenth street. James G. Doak & Co., Fred A. Havens & Co., John W. Emery and E. J. Kreitzburg submitted estimates.

# WHEN YOU PAINT YOUR HOUSE

You should insist that the first coat should be put on before a particle of putty is used.

Unless this is done a reputation for bad work naturally follows both the Architect and Builder and this holds good in both new and old work.

Dry wood as well as dry brick will not hold putty no matter what other effort is made in that direction

I will cheerfully give you an estimate for painting new or old work on the "BEST WAY" basis and guarantee results.

whose first name is Adolph, and whose office is located at 1433 Brown street, is very busy just now with his many men renovating the fronts of brick houses.

CHRISTENSEN does this work by his process of cleaning and repainting the brick that the whole front looks even better than it did when first erected. The work does not cost as much as repainting, while it looks very much better, for it brings out the world renowned beauty of the old time Philadelphia pressed brick front.

CHRISTENSEN'S process is a sure cure for the unrentable dwellings. Owners as well as Real Estate agents should make a note of this fact.

# WHEN YOU PAINT YOUR HOUSE

You should insist that the first coat should be put on before a particle of putty is used.

Unless this is done a reputation for bad work naturally follows both the Architect and Builder and this holds good in both new and old work.

Dry wood as well as dry brick will not hold putty no matter what other effort is made in that direction.

I will cheerfully give you an estimate for painting new or old work on the "BEST WAY" basis and guarantee results.

# WHEN YOU PAINT YOUR HOUSE

You should insist that the first coat should be put on before a particle of putty is used.

Unless this is done a reputation for bad work naturally follows both the Architect and Builder and this holds good in both new and old work.

Dry wood as well as dry brick will not hold putty no matter what other effort is made in that direction.

I will cheerfully give you an estimate for painting new or old work on the "BEST WAY" basis and guarantee results.

PHILADELPHIA, WED'Y NOV. 11, 1908

Mr. Henry E. Sealey, who was president of the bankrupt Henry E. Sealey Company, and who was arrested and held under bail on the charge of embezzlement, made by Goodfellow & Son, contractors, in this city, was discharged by the court on Friday last because, as the judge stated, Mr. Sealey had not been guilty of any criminal act and that the Goodfellows must go to the receiver in bankruptcy, for an adjustment of their claim. We make this statement in justice to Mr. Sealey, because we have known him for a quarter of a century as a straightforward, capable business man. The case in itself shows how easily a stigma can be cast upon the honesty and integrity of an upright, conscientious man without the shadow of common sense or justification, while at the same time there seems to be no redress.

It would be great reading were we able to give the correct figures representing the terrible shrinkage in the employment of labor and the use of material in all the ramifications of the industries of this city since October, 1907, when the tie up began. Unfortunately, these figures are not available, consequently it is left to those of our readers who have a taste for such data to form their own estimates, but it is conclusive that if the shrinkage in one small end of our own manufacturing interests amounts to over eleven millions of dollars, what must have been the shrinkage in the earnings of labor in the whole of the city's industrial world when we consider the volume of our textiles, iron and other industries?

Referring to the industrial history of the past, embracing the political struggle between Cleveland and Harrison, in 1892, as well as that between Bryan and McKinley, in 1896, and the influences expressed on building operations during the months from January to October of each of those years respectively, we find that the results in 1892 in building operations showed an increase of 906 new buildings and an increase in the investment in building operations of all kinds, including alterations and additions, \$6,252,886, but the aftermath that was reaped came in 1894, which according to 1893, when the loss for the same months is 1065 new buildings, and a loss in the total invest-

ment in building operations of all kinds, of \$4,660, 428. This it must be understood was the year of Mr. Cleveland's inauguration.

In 1896, the year of the struggle between Mr. McKinley and Mr. Bryan, we find that there were only 340 new buildings less than in 1895, while the decrease in the amount expended in building improvements of all kinds was only \$270,750.90.

Those of our readers who wish to make comparisons of the above with the results of the present year, in order to be fair, must keep in mind the great cost of labor and material this year, which, of course, cut an important figure in softening the falling off in the expenditures for building improvements thus far in 1907. Besides which, it is also necessary to understand that in 1906 and 1907 there was a building boom, for in the same months of 1906 there were erected 7,550 new buildings and the total expenditures amounted for the ten months to \$32,513,533, or, in other words, in 1906, for the twelve months there were erected 16,344 new buildings, or more than in any year since the city was founded.

Also keep in mind the fact that in 1907 there were 8,562 new buildings for the ten months of that year, while the total expenditures amounted to \$32,492,141; while the total number of new buildings in the twelve months of 1907 was 8,978, and the total expenditures in that year amounted to \$34,390,476.

Here, then, is an opportunity to wade into the perplexing difficulties as to how far-reaching were the political influences causing the great falling off during the present year when compared with the results of 1906 and 1907, keeping in mind the fact that in these two years there were 19,732 new buildings all of which were either two and three-story dwellings. Would not this in itself create a considerable hold up in building operations for the present year, as it can be safely said that the result of the 1906 and 1907 would afford comfortable housing for 100,000 people or equal to four times our yearly increase in population according to the last census?

There is considerable complaint expressed by real estate brokers because of the present mortgage rate of interest of five and four-tenths per cent. exacted for real estate mortgages, as it is held to be an embargo upon transactions which at a lower rate of interest might go through. This is explained, however, by the fact that the market price of railroad and other bonds has been so low that many first-class securities can now be purchased which will yield a better interest rate and which can be promptly sold in the future at a probable increase in their market value.

It will be recalled that, in our July report of this year, we laid considerable emphasis on what we termed the lack of force for our house market, and now we submit for consideration in this selfsame direction the fact that even those of our home owners although in many cases hold very small equities in the houses they own, have succeeded in protecting them to an extent almost without a parallel in the face of the most drastic conditions ever experienced in this country.

We think that this statement is substantiated by the fact that, notwithstanding there have been many dwellings purchased with but two or three hundred dollars in cash, the record of foreclosure cases, as per the Sheriff's catalogue, were 64 in November, 1907; there were but 84 in November, 1906, and in October, 1906, there were only 41.

Those who desire to confirm this statement by referring to the Sheriff's advertisements must be careful to eliminate the properties sold for taxes.

The real estate market seems to be a difficult problem, for, while here and there we find brokers who express the satisfaction with a "boom" in Easy street expression of confidence, there are others who, with long drawn faces and ominous glances, give you a shiver of the head and a shiver of the shoulders which mean more than words express.

We do know, however, that there is considerable inquiry in West Philadelphia for small dwellings and some slight inquiry for manufacturing sites and plants. The feeling is not an aggressive movement. It is quite enough to indicate that the buying movement of the wholesome, generous kind is highly probable.

The wild-eyed man who became rampant with his assertion during the "Cleveland" time that there were sixty thousand empty houses in Philadelphia at that time, is now on deck with his estimate of thirty thousand empty houses at present in West Philadelphia alone. Of course, such a statement falls to the ground as soon as it is touched by the cold analysis which figures give to it, for if we take his thirty thousand empties and multiply them by the average width of dwellings, we have 480,000 linear feet. As there are 5,280 feet in a linear mile, which, if we divide in order to get the number of miles, we have a fraction over ninety miles of empty houses. If that man's statement is correct. We personally think, however, that if there were ninety miles of houses taken over the Philadelphia area, there would be very few left for the people of that section.

Hence, it is conclusive that the unthinking man, with his haphazard characteristic, is a dangerous factor in any community. There are considerable more empty houses in this city at present than there were in July last. This is plain to everyone, and, while we made considerable effort last July to arrive at a fair estimate of the empties, we have been greatly pleased the time in that direction for the present writing. Conditions are abnormal, even in the business of hair cutting, and everyone knows it, even to the man who does not feel it. It is foolish to suppose that the establishment of old time property can be consummated in a week or a month. The proposition involving more empty houses, which property, through reflective agencies, is too far removed from the common centre to permit of an immediate realization of anybody's hopes, however excited or fanciful, and anything else is a simple effort to fool ourselves.

The change will be gradual and persistent as the corn grows, or thrift and energy and unrelaxed effort works out the future of the individual conditions, the same as it does that of the people of a nation in a utilization of natural forces, and, thank God, our country is abundantly blessed in that direction.

We have 442 two-story dwelling this year against 7141 for the same ten months of 1907, a loss of 2,699. The yards responsible for the heavy loss are as follows:

The Eighth Ward, 5; Tenth, 6; Fourteenth, 2; Sixteenth, 19; Eighteenth, 1; Twenty-second, 203; Twenty-third, 17; Twenty-seventh, 190; Twentieth, 5; Thirtieth, 5; Thirty-third, 350; Thirty-fourth, 628; Thirty-fifth, 6; Thirty-sixth, 300; Thirty-seventh, 1; Thirty-eighth, 1; Thirty-ninth, 4; Fortieth, 13; Forty-second, 171; Forty-third, 254; Forty-fifth, 235. The only gains that attract notice are: the Second, 8; Thirteenth, 29; Twenty-ninth, 1; Forty-first, 3; Forty-second, 192; Twenty-eighth, 101; Forty-fourth, 55; Forty-sixth, 23. The three-story dwellings by wards, including the yards, are as follows: First, 1; Second, 1; Third, 1; Fourth, 1; Fifth, 1; Sixth, 1; Seventh, 1; Eighth, 1; Ninth, 1; Tenth, 1; Eleventh, 1; Twelfth, 1; Thirteenth, 1; Fourteenth, 1; Fifteenth, 1; Sixteenth, 1; Seventeenth, 1; Eighteenth, 1; Nineteenth, 1; Twentieth, 1; Twenty-first, 1; Twenty-second, 1; Twenty-third, 1; Twenty-fourth, 1; Twenty-fifth, 1; Twenty-sixth, 1; Twenty-seventh, 1; Twenty-eighth, 1; Twenty-ninth, 1; Thirtieth, 1; Thirty-first, 1; Thirty-second, 1; Thirty-third, 1; Thirty-fourth, 1; Thirty-fifth, 1; Thirty-sixth, 1; Thirty-seventh, 1; Thirty-eighth, 1; Thirty-ninth, 1; Fortieth, 1; Forty-first, 1; Forty-second, 1; Forty-third, 1; Forty-fourth, 1; Forty-fifth, 1; Forty-sixth, 1; Forty-seventh, 1; Forty-eighth, 1; Forty-ninth, 1; Fiftieth, 1.

Right here among our statistics we desire to introduce into our own opinion, and we think we have enough dwellings of the two and three-story character justified by present conditions; in other words, we think that we are too far ahead of requirements justifying plotting in and taking chances. This sort of reasoning will appeal to the good sense of the average operative builder, but there will be some who will take chances, and, indeed, there may be lost to a few men with nerve and capital who will win out, while there will be others who will wish that they had not ventured. We are certain that the real estate market happens in industrial conditions that capitalists will be unusually careful in backing ventures of this nature, and in this itself will be of sufficient inducement to limit operation work to a degree justified only by radical conservatism, for we have really houses enough to meet present requirements.

We notice that the people in the fashionable quarters; that is, below Market street, even with their luxurious homes, are disposed to sell, as there are many such properties in the market. Whether this is the result of an increase in the suburban trade, or because of a decadence of the status of the fashionable quarters, we are not prepared to assert, but simply give it as a feature of the situation.

There are no office buildings over two-story to report this year.

The industrial question at present is enigmatical, but we anticipate that the necessities of the people of the great West, now that political issues are settled, will express at least a part of that selfsame vigorous demand which rapidly rehabilitated the prosperity of the whole country after the election of Mr. McKinley, for, as Garfield once said, "God reigns and the government at Washington still lives."

There is a loss of 87 industrial buildings this year, or, in other words, 181 in 1907 for the same months against 94 this year.

There has not been a single gain in any of the so-called industrial buildings. The loss in the investment in buildings of this character is particularly serious, it being \$3,860,940, the greatest loss in any factor in the building which is a number and \$1,777,665 in the investment. It will be seen that the transfers of real estate number 16,841 this year, against 22,016 in the same months of 1907, a loss of 5,175. While the cash estate market for the year up to the beginning of the present month. For our own part we do not anticipate any great improvement during the remaining months of the year, particularly in the dwelling end of the properties. It will also be seen that the mortgage percentage of

incubance on the properties transferred this year is 58.5 per cent, while last year it was 53.8 per cent., an increase of 5.7 per cent. In order that our readers may comprehend the steady increase in the obligations of this character, we herewith give the percentage of mortgage incubance on the properties transferred during the same months of each year since 1900. In that year it was 39.6 per cent.; 1901, 46.8 per cent.; 1902, 39.8 per cent.; 1903, 39.2 per cent.; 1904, 45.3 per cent.; 1905, 46.9 per cent.; 1906, 50.1 per cent.; 1907, 52.8 per cent.; 1908, 53.8 per cent.

The ground rent incubance on the real estate transferred this year amounts to \$4,660,373.23, which, on a six per cent. basis, represents a further incubance of 6.4 per cent., or a total incubance of 64.2 per cent. These figures, to say the least, should make our readers do some serious thinking because, if the properties that bear no incubance are eliminated, it will afford much room for good guessing to determine the real percentage of incubance on the properties sold that were thus burdened.

There were 30 miscellaneous buildings last year and 110 this year. Those erected during the same months of 1907 cost \$3,340,715, while those of this year cost \$4,057,057, a gain in favor of 1908 of \$716,342. The strong feature this year is the large increase in the investment in apartment houses, for the investment in these is greater than last year by \$299,000, and in libraries of \$32,000.

The one hundred and ten miscellaneous buildings include hospitals, \$509,000; fire houses, \$58,400; garages, \$278,727; apartment houses, \$297,000; laundries, \$112,000; dispensaries, \$112,000; bath houses, \$50,000; bank, \$21,000; libraries, \$32,000; hall park, \$250,000; synagogue, \$60,000; police stations, \$271,500; club houses, \$59,000; cock pocks, \$28,000; parish houses, \$50,500; auditor, \$25,000; bath houses, \$33,330; chapels, \$37,700; opera house, \$750,000; storage shed, \$70,000; power houses, \$39,000; hall, \$46,000, and a number of other buildings of minor importance.

# WHEN YOU PAINT YOUR HOUSE

You should insist that the first coat should be put on before a particle of putty is used.

Unless this is done a reputation for bad work naturally follows both the Architect and Builder and this holds good in both new and Boldwork.

Dry wood as well as dry brick will not hold putty no matter what other effort is made in that direction.

I will cheerfully give you an estimate for painting new or old work on the "BEST WAY" basis and guarantee results.

## ARCHITECTS' NOTES.

E. Allen Wilson, architect, 815 Land Title Building, is engaged on plans and specifications for sixty two-story brick nine-room dwellings, to be built on the east and west sides of Sixty-third, between Master and Media streets, for John L. Fry. They will be finely finished on the interior with every modern appointment and convenience. They will have slag roofs. He also has plans on boards for the following: a large brick amusement hall, measuring 40 x 100 feet, to be built at Wayne Junction, in the French style of architecture. Also plans for eight one-story brick stores, measuring 16 x 40 feet each, at the same location. Also plans for eighteen two-story brick dwellings, measuring 16 x 32 feet each, and three stores and dwellings, to be built at Fifty-fifth and Baltimore avenue. All the latest features will be introduced in the construction of this operation. The name of the owner is withheld. Mr. Wilson has delivered plans to Alexander Ferguson for two three-story stores and apartments, 18 x 60 feet, containing two stores and two apartments each, to be built at Fifty-eighth and Chester avenue; also three three-story stores and dwellings and plans for ninety-seven two-story houses. Plans and specifications have been distributed for office fixtures, etc., for the offices of Messrs. Bayuk Bros.' new building, at Third and Spruce streets. The work will cost \$2500 and consist of fireproof partitions, Mission style partitions, tile, plate glass and ornamental grilles. The same architect has completed plans and specifications for a residence in Atlantic City, to cost \$10,000, for Mr. Henderson, 30.8 x 46.6 feet, three-story and basement, containing 20 rooms. Local sub-contractors have been invited to bid. No general contractor. # WHEN YOU PAINT YOUR HOUSE

You should insist that the first coat should be put on before a particle of putty is used.

Unless this is done a reputation for bad work naturally follows both the Architect and Builder and this holds good in both new and Boldwork.

Dry wood as well as dry brick will not hold putty no matter what other effort is made in that direction.

I will cheerfully give you an estimate for painting new or old work on the "BEST WAY" basis and guarantee results.

## ARCHITECT'S NOTES.

Oliver Randolph Parry, architect, 1723 Chestnut street, has been commissioned to design and supervise the erection of a number of high-class suburban houses, to be erected at Lansdowne Park, for the MacWaters-West Company, and has invited estimates on five houses from Wm. R. Dougherty, F. T. McGuire, Burd P. Evans & Co., C. W. Rodgers, George L. Tipping, Thomas C. Trafford & Company, Wilkie Bros., Kennedy Construction Company and Donovan & Company, of Philadelphia, and James E. Hazzard, of Southampton, Pa. House "A" is of Spanish design, 38 feet x 40 feet in size, contains fourteen rooms and will be of white Avondale stone and rough cast plaster with red Spanish tile roof. House "B" is 30 feet x 39 feet in size, contains thirteen rooms and will be stone and shingle with shingle roof. House "C" is English half timber, 33 feet x 35 feet, and contains thirteen rooms. It will be stone and rough cast with stained shingle roof. House "D" is Colonial, 33 feet x 36 feet, contains twelve rooms and will be of stone and rough cast plaster with shingle roof. House "E" is stone and frame construction, 33 feet x 38 feet, with shingle roof and contains thirteen rooms. They will be finely finished on the interior in hardwood, oak floors, sanitary plumbing, combination gas and electric fixtures, hot water heating and all other modern appointments.

Horace Trumbauer, architect, Land Title Building, has plans on boards for a three-story Colonial style residence, measuring 50 x 75 feet, to be built in Norristown, Pa., for Harry B. Tyson.

E. Allen Wilson, architect, 815 Land Title Building, has invited revised estimates from Henry L. Brown, and F. R. Hill, builders, on the three-story brick and frame residence, 73½ x 44 feet, to be built in Oak Lane, for F. S. Kramer.

The Board of Directors of the Home for Hebrew Orphans, at the southwest corner of Tenth and Bainbridge streets, is completing the plans for the erection of their new home on a four-acre tract of ground at Fisher's lane and Spencer street, to cost about \$70,000.

Harry J. Koehler, real estate broker, 1201 Chestnut street, states that a company has been formed with a capital of over a million dollars, and that many sites in Moylan, Morton and Swarthmore, Delaware county, Pa., will be purchased on which to build handsome residences in various styles of architecture.

The West Girard Avenue Baptist Church will build a new edifice at the northeast corner of Fifty-eighth and Thompson streets. Competitive plans have been invited

from Hewitt, Stevens & Paist, 671 Bullitt Building, and Geo. E. Savage, Provident Building. The plans call for a stone and brick structure, 80 x 100 feet. Rev. H. S. Watson is the pastor.

Milton B. Medary, architect, 1414 South Penn Square, has distributed plans for estimates on the two-story brick factory building, to be built at Seventeenth street and Sedgley avenue, for the Screw Cutting Company, of America. The following builders are bidding: Fred. A. Havens & Co., William R. Dougherty, Appleton & Burrell, Joseph Myers and Charles W. Denny.

E. F. Guilbert, city architect, Newark, New Jersey, is preparing plans for the proposed new high school for the Essex County Eastern School District. The structure will be located at Newark. It will be of brick and stone, fine interior finish and thoroughly equipped with all modern conveniences. Mr. Frederick F. Guild is president of the Board of Education, and Mr. George W. Tomkins, vice president.

Henry L. Reinhold, Jr., architect, northeast corner of Tenth and Sanson streets, associated with Edwin B. Lewis, has plans in the course of preparation for the two new school buildings to be built in Upper Darby, Delaware county, Pa., by the School District of Upper Darby township. One will be built at Garrettford and the other at Keystone. The plans will call for two-story ten-room stone structures, to cost about \$50,000. Previously noted.

The Directors of the Firemen's Insurance Company, of Newark, New Jersey, have authorized a committee to have plans and specifications prepared for an office building, to be erected at Broad and Market streets, Newark, on the site of the company's present building. The proposed building will be sixteen stories high, fireproof in construction and equipped with all modern conveniences. The estimated cost is from \$500,000 to \$750,000.

F. Russell Stuckert, architect, 1421 Chestnut street, has been engaged to prepare plans for the new store building, to be built at 34 North Eleventh street, for Harry C. Kahn, 32 North Eleventh street. The plans will call for a six-story salmon brick structure, measuring 20 x 125 feet, to match the present building, at 32 North Eleventh street. The new building will cost about \$35,000, and plans will be ready for estimates in about three weeks.

The Maritime Exchange, the Trades League and the Board of Trade have appointed committees who will take action this week to select a site for the new immigration station. If the committees find

that there is no available site here it is probable that the only alternative will be to purchase the one offered in Gloucester, N. J. There is \$250,000 available for the site, but to date none has been offered in Pennsylvania to the Department of Commerce and Labor.

At Hartford, Conn., the Municipal Art Society, of Hartford, Conn., will receive designs in competition until January 13, 1909, for an electrolier, to be located at Trumbull and Pearl streets, Hartford. Drawings to be sent to Mr. H. B. Buck, secretary, Municipal Art Society, Hartford, Conn.—The Technical High School Commission will receive plans in competition for the proposed new Technical High School. The estimated cost of the structure is about \$450,000. The president of the commission can give additional information.

Ballinger & Perrot, architects and engineers, 1200 Chestnut street, have completed drawings and specifications for new buildings and additional story to present building for the wall paper manufacturing plant of Becker, Smith & Page, Inc., on the south side of Snyder avenue, between Water and Swanson streets. The new buildings consist of a three-story manufactory, 306 feet long by 84 feet wide, with floors and roof construction of wood, with brick walls; a four-story building, 48 feet by 48 feet, with floors and roof of reinforced concrete fireproof construction, and a power house building, one story in height, 55 feet by 133 feet, consisting of engine, boiler, and fan rooms, and coal pocket. There will also be the addition of a third story to the present building, 65 by 306 feet, of slow burning wood construction, with brick walls. The following builders have been invited to submit bids: Armstrong & Latta, Roydhouse-Arey Company, Cramp & Company, A. Raymond Raff, William R. Dougherty, J. E. & A. L. Pennock, P. Haibach Contracting Co., George Kessler, B. Ketcham's Sons, George L. Sipps, Matthew Schmidt. The same architects have also completed plans for an ice manufacturing plant for the American Ice Company, at Glenwood and Montgomery avenues. The new buildings will consist of buildings for freezing, storage and distribution of ice, a power house and an office. The freezing building will be 60 by 170 feet, the ice storage building 60 by 120 feet, the distributing building 43 by 60 feet, and the power house 130 by 51 feet; all of wood construction, with brick walls. The following contractors have been invited to submit bids: A. Raymond Raff, Roydhouse-Arey Company, Appleton & Burrell, William Rea's Son, Cramp & Company, Herbert E. Havens, F. L. Hoover & Son, P. # WHEN YOU PAINT YOUR HOUSE

You should insist that the first coat should be put on before a particle of putty is used.

Unless this is done a reputation for bad work naturally follows both the Architect and Builder and this holds good in both new and Boldwork.

Dry wood as well as dry brick will not hold putty no matter what other effort is made in that direction.

I will cheerfully give you an estimate for painting new or old work on the "BEST WAY" basis and guarantee results.

## THAT MAN CHRISTENSEN

whose first name is Adolph, and whose office is located at 1433 Brown street, is very busy just now with his many men renovating the fronts of brick houses.

CHRISTENSEN does this work by his process of cleaning and repointing the brick that the whole front looks even better than it did when first erected. The work does not cost as much as repainting, while it looks very much better, for it brings out the world renowned beauty of the old fine Philadelphia bonded brick front.

CHRISTENSEN'S process is a sure cure for the unrentable dwellings. Owners as well as Real Estate agents should make a note of this fact.

# WHEN YOU PAINT YOUR HOUSE

You should insist that the first coat should be put on before a particle of putty is used.

Unless this is done a reputation for bad work naturally follows both the Architect and Builder and this holds good in both new and Boldwork.

Dry wood as well as dry brick will not hold putty no matter what other effort is made in that direction

I will cheerfully give you an estimate for painting new or old work on the "BEST WAY" basis and guarantee results.

Oliver Randolph Parry, architect, 1723 Chestnut street, has been commissioned by Wilkey Bros. 14 South Broad street, to prepare plans and specifications for a large operation of handsome residences and stores in different styles of architecture to be built on the tract of ground at the corner of Fifty-fourth street and City Line avenue, which was purchased from L. C. Zimmerman. The plans will call for eighty in all, to cost from \$3,000 to \$4,500 each. They will be finely finished on the interior, with all modern appointments and conveniences. It is the intention to make this operation appeal particularly to people of moderate means who would be attracted by the high class surroundings at this point, which is one of the best neighborhoods in the suburbs of Philadelphia. When completed the operation will be a valuable acquisition to the locality.

E. Allen Wilson, architect, Land Title Building, has completed plans for twenty-one houses, to be built at Fifty-fifth and Christian streets, for William A. Harnett. Eminent plans will shortly be invited. Plans have also been completed for ninety-seven houses to be built by James J. Harnett in the southern section of the city. The same architect has been commissioned by Harry P. Havens to prepare plans and specifications for a high class four-story brick and stone apartment house, 22 x 80 feet, to be built at Fifty-second and Pine streets. It will contain four suites of eight rooms each. The design will be in the Colonial style of architecture, with limestone trimmings. Hot water heat, electric lights, dumb waiters and all other modern appointments will be introduced.

W. Bruce Barrow, real estate broker, 130 N. Twelfth street, has negotiated a deal for the sale of the building at the northeast corner of Filbert and Hutchinson streets, measuring 32.8 x 32.3 x 65 feet, for about \$40,000. It is stated that the purchaser will make improvements.

F. Russell Stuckert, architect, 1420 Chestnut street, has distributed plans for the two and a half story stone residence, measuring 50 x 44.3 feet, to be built in Overbrook, Pa., for George A. Supple. R. C. Ballinger & Co., William R. Dougherty, A. L. Fretz & Son and Stacy Reeves & Sons, builders, are estimating.

Henry L. Reinhold, Jr., architect, northeast corner of Tenth and Sansom streets, has completed the plans and specifications for the reinforced concrete power and drying house, 40 x 120 feet, to be built at the southwest corner of American and Willow streets, for the Delaware Storage and Freezing Company.

John D. Winchell, real estate broker, 1207

Betz Building, has sold for Joseph Wharton, a large tract of land at Twenty-fourth and Somerset streets, measuring 300 x 495 feet, for a consideration of \$80,000. The purchaser has had plans prepared for an operation of two and three-story brick dwellings to be erected on the site.

Officials of the Pennsylvania Hospital have sent requests for financial aid to several hundred prominent Italians of this city, through "La Voce Del Popolo," for the purpose of building a hospital for Italians. Several thousand dollars have been collected. John T. Lewis, Jr., secretary of the Pennsylvania Hospital, can give information.

The American Oncologic Hospital has purchased a site at the northeast corner of Fifth and Chestnut streets, measuring 250 x 225½ feet, extending back to Ludlow street, with a view of erecting a hospital thereon. John D. Allen, architect, Betz Building, prepared preliminary sketches for a four-story brick fire-proof structure, to cost about \$150,000, some time ago.

Hewitt, Stevens and Paist, architects, 671 Bullitt Building, have been selected by the building committee in competition to prepare the plans for the new West Girard Avenue Baptist Church, to be built at the southeast corner of Fifty-eighth street and Girard avenue. The plans will call for a two-story brick and stone structure, 80 x 100 feet, to cost about \$35,000.

The Chester Shipping Company, of Chester, Pa., have purchased the river front property at the foot of Market street, in Chester, from Dr. Anna P. Sharpless, of this city. The frontage on the river is about three hundred feet and the depth on Market street is about one hundred and seventy feet. The price paid was \$25,500. It is stated that the company will improve the wharf and build a permanent warehouse.

The North Baptist Church, at the northwest corner of Oxford and Twenty-third streets, has been purchased by the Home Missions and Church Extension of the Methodist Episcopal Church, who will hand it over to the Haven Methodist Colored Episcopal congregation, of Twenty-sixth and Jefferson streets. It is the purpose of the North Baptist Church congregation to build a new edifice on Columbia avenue near Twenty-seventh street.

Frank P. Millner & Co., architects, Home Life Building, Washington, D. C., have been commissioned to prepare plans and specifications for a court house to be erected at Stanford, Lincoln county, Kentucky, at a cost of \$35,000. The plans will be ready for bids in about six weeks. The same architects are preparing plans for a court house to be erected at Salisbury, North Carolina, to cost \$80,000. It will be of granite, all modern conveniences.

Charles M. Wells, architect, 518 Walnut street, is engaged on plans and specifications for a brick and frame twin residence, to be built in Oak Lane, for Thomas W. Dagny. The same architect is also engaged on plans for alterations to the brewery building at Queen street and Pulaski avenue, Germantown. He has completed plans for a two and a half story frame residence to be built on Linden avenue, Rutledge, Pa., for William S. Love.

L. H. Fowler, architect, The Winona, Baltimore, Maryland, has prepared plans for a dwelling to be erected at Chattolance, Maryland, for Miss N. Brent, 816 St. Paul street, Baltimore. It will be two stories high, 47 x 25 feet, of frame, hardwood finish and floors, open plumbing, steam heat, electric lights, and the usual conveniences. The cost will be \$7,000. Brown & Morgan, Builders' Exchange, John Cowan, 106 West Madison street; William E. Horn, 2700 Huntingdon avenue; Glaffelter & Chambers, 2072 Woodberry avenue, all of Baltimore, are figuring on the plans.

Pell & Corbett, 122 East Twenty-fifth street, New York City, are the successful architects in the competition for plans for new municipal buildings to be erected at Springfield, Massachusetts, at a cost of about \$1,000,000. Over one hundred architects submitted plans. The plans of Pell & Corbett call for three buildings making a harmonious group, consisting of a municipal building, a town hall and a clock tower two hundred and seventy-four feet high. The municipal building will be erected first and the other two buildings later. It will cost \$500,000, and the size will be 115 x 175 feet. The material has not yet been settled, but will likely be marble or limestone. Fine interior finish and all modern conveniences will be provided. No contracts have been awarded.

Marvin & Davis, 1133 Broadway, New York City, have been commissioned to prepare the plans for the sixteen-story office building to be erected at Newark, New Jersey, for the Firemen's Insurance Company. The estimated cost is about \$400,000. It will occupy the site of the company's present building, at Market and Broad streets, Newark. Mr. D. H. Dunham is president of the company.—Architect George Frederick Pelham, 503 Fifth avenue, New York City, has about completed plans for two apartment houses to be erected on the west side of Broadway, New York, between One Hundred and Fifty-sixth and One Hundred and Fifty-seventh streets, for Fleischman Brothers, 507 Fifth avenue. # WHEN YOU PAINT YOUR HOUSE

You should insist that the first coat should be put on before a particle of putty is used.

Unless this is done a reputation for bad work naturally follows both the Architect and Builder and this holds good in both new and Boldwork.

Dry wood as well as dry brick will not hold putty no matter what other effort is made in that direction.

I will cheerfully give you an estimate for painting new or old work on the "BEST WAY" basis and guarantee results.

# WHEN YOU PAINT YOUR HOUSE

You should insist that the first coat should be put on before a particle of putty is used.

Unless this is done a reputation for bad work naturally follows both the Architect and Builder and this holds good in both new and Boldwork.

Dry wood as well as dry brick will not hold putty no matter what other effort is made in that direction

I will cheerfully give you an estimate for painting new or old work on the "BEST WAY" basis and guarantee results.

## ARCHITECTS' NOTES

The National Wholesale Lumber Dealers' Association will hold its next annual meeting at the Bellevue-Stratford Hotel, on March 2d and 3d next.

A. C. Shand, chief engineer of the Pennsylvania Railroad, office Broad street, has tentative plans under way for the new passenger station to be built in Baltimore in the future.

Walter F. Price, architect, 714 Walnut street, has completed plans for the two-and-a-half-story stone and plaster residence to be built in Bryn Mawr, Pa., for Mrs. H. W. Elliott. Bids will be invited in a short time.

Harbert, Claghorn & Hood, real estate brokers, 1218 Chestnut street, have sold a 120-acre farm in Frazer, Pa., for Mrs. Sarah J. Rogers, for a consideration of \$20,000. The purchaser is a Philadelphian, but the name is withheld.

George T. Pearson, architect, 427 Walnut street, has plans on boards for the re-building of the club house of the Philadelphia Cricket Club, in Chestnut Hill. These are the final plans and will call for a three-story building of stone, to cost about \$40,000.

Frank H. Keisker, architect, Perry Building, has completed plans and invited estimates from J. Richard Jackson and Edward Fay & Son, for a three-story brick residence, measuring 21 x 62 feet, to be built on Broad, near Rockland street, for Charles H. Edenborn, to cost about \$10,000.

Hirst & McMullin, real estate brokers, West End Trust Building, have made settlement with a purchaser, whose name is withheld, for two and a half acres of land on Morris avenue, Bryn Mawr, Pa., for a consideration of \$23,000. A fine residence and stable, to cost \$50,000, will be built on the tract.

The Amsterdam Lodge of Elks, in Amsterdam, New York, held a meeting last week and a proposition to build a new club house was thoroughly discussed. The trustees have purchased a site, 66 x 120 feet. It is stated that architects will be invited to submit competitive plans for a building, to cost about \$35,000.

Charles F. Jenkins, secretary of the Farm Journal Publishing Company, at 1024 Race street, took title to the properties at 216-18 and 20 West Washington Square for a consideration of \$28,000. ### OLD USEFULNESS.

What better name can be given to Samuel H. French & Co.'s desk tablet for 1909 than the above. Year after year and for many years the French desk tablet has promptly appeared as a slight New Year's testimonial to the patrons and friends of the oldest building material house in this city. Indeed, the Fourth and Callowhill street business office of the company has become such a landmark that it is to be hoped that a few more generations at least of the Samuel H. French & Co.'s school will be continued to perpetuate the business with its self same old-time business characteristics which have been the feature of the establishment for sixty-five years without the slightest interruption. The painting season will soon be here. When it comes just keep in mind the fact that Samuel H. French & Co.'s buck lead is the best white lead in the world, as many of our personal friends will attest.
